## YS Yong

**Managing Director & Chief Designer,  
Bristol Group of Companies**

“We deliver effective solutions for the workplace. Whether it’s a home office, a corporate headquarters or a co-working space, our designs seamlessly combine form and function honed by our years of expertise and products which offer a high degree of customisation due to our on-site production capabilities. These solutions have been thoroughly thought out and tested rigorously so you can work better.”

## Albott Studio

Bristol’s interdisciplinary Albott studio was established in 1990. Under the leadership of Founder Mr.Yong Yook Seng, a dedicated in-house Research and Development Division was formed to conduct studies in the field of ergonomic seating and systems design.

Today, this facility houses a team of 30 talented individuals, focusing on various aspects of product development, operating within a 20,000 sq ft facility which is equipped with the latest in scanning and measuring technologies, and a dedicated CNC machining center and compliance testing lab.

## In Good Company

Since being established in 1983, Bristol has grown from trading in chair components to becoming a company adept at designing and producing quality office furniture. We have continued to evolve by using a mix of methodologies and our years of expertise in handling projects of various scales has made us the most preferred partner of designers across the region.

Widely recognized as one of Asia’s leading office furniture producers, our commitment to exceptional design values, innovation and sustainable practice has allowed us to expand across 6 countries in Asia.

## MYKO. Versatile in nature.

Myko was designed with an ideology to create the ultimate multi-purpose chair. The design intention was to be distinctive, versatile and highly mobile. A design which is crafted in multiple configurations for varied purposes and environment.

Myko is ideal for formal as well as informal areas which can easily adapt to different situations when necessary. Being light and having a unique silhouette by reducing the unnecessary mechanical parts, makes Myko feasible for usage beyond corporate offices, such as hospitality, retail, hospitals, schools and recreational markets.

In order to meet the needs of the diverse population, Myko was initiated keeping in mind ergonomically and anthropometric standards. The chair's ease and range of adjustments provide for a fuss free mechanism and a purposeful fit as per the desired needs.

## About the design

MYKO's design is meant to emulate human nature in its raw form. The backrest employs two spines, made from nylon fiberglass, that work like fishing rods, and allows a person to lean back fluidly, without experiencing rigidity. The spines provide enough bounce to give a floating sensation to the user as he/she sits back.

MYKO employs a unique technique of double-injection molding, where the two spines are joined by a flexible polypropylene backrest which provides further flexibility. The backrest curve is subtle and provides comfort and ample lumbar support to people of different heights. the flexibility of the polypropylene back results in consistent lumbar contact regardless of posture.

Whereas, the armrest design is inspired by a sapling with a sprouting leaf which symbolizes growth and new beginnings. The sleek armrests provide sufficient support while remaining non-intrusive when getting up or sitting down.

The MYKO chair is sleek and lighter suitable for compact spaces and networking. The cut-out back gives an ease in stacking and relocation. It comes with and without the armrest option and is available in different bases.

## Stackable Variants

Myko maximizes space efficiency allowing both horizontal and vertical stacking. These are ideal for multi-purpose applications and spaces which seek frequent reconfiguration such as, cafeterias, auditoriums, lectures and training rooms, meeting rooms and offices.

## Nesting Variants

Be it classrooms, training area or the lobby, Myko goes anywhere you work. In today's dynamic world, where space is constrain a meeting room gets converted to an activity based area in no time. Myko with is dynamics fits all such situations and gives an all-rounder comfortability.

Myko maximizes space efficiency allowing horizontal nesting. These are ideal for multi-purpose applications and spaces which seek frequent reconfiguration such as, cafeterias, auditoriums, lectures and training rooms, meeting rooms and offices.

## Store Bases

In order to keep the clutter off the floor and provide more space to move around, Myko gives an option of store bases. This variant is mostly suited for spaces like training rooms, conference rooms, library or a classroom.

## All-rounder. Purposeful.

Myko is also available with polished aluminium trestle base, both available with castors or glides versions. This swivel model is suitable for meeting rooms, offices, and residential study rooms. It also features an optional writing tablet for campus or auditorium use.

## Adaptable. Height Adjustable.

Myko is adaptable in all kind of places and helps collaboration at all levels, thus never compromising on comfortability and is suitable for touchdown spaces. The Myko Team base can be used with height adjustable tables, as it is built with height adjustability, a back tilt and even swivel mechanism.

## Myko Bench. Public Seating.

Myko benches are an apt for public seating and is available in two variants. Being durable and low maintenance these waiting area chairs are suitable for airports, hospitals, retails, hotel and office lobby or receptions.
